A TROLL LEARNING CENTER

This two-disk program is an ideal introduction to maps and globes, latitude and climate, and longitude and time zones.

Step-by-step demonstrations with colorful graphics make it easy for students to understand what a map index and grid are, and how lines of latitude and longitude are used to give an exact address to any feature on a map or globe.

There's also a unique "World Traveler" simulation, in which students assume the role of ghost hunters, who must follow clues and use map skills to locate the ghostly relatives of a mysterious client.

THIS LEARNING CENTER CONTAINS:

- a 2-disk MICRO-SOFTWARE program
- a User's Guide
